

FEP Medicare Prescription Drug Program FEP Blue

Focus Option

2024 Formulary

List of Covered Drugs

**PLEASE READ: THIS DOCUMENT CONTAINS INFORMATION
ABOUT THE DRUGS WE COVER IN THIS PLAN**

HPMS Approved Formulary File Submission ID: 24197

This formulary was updated on 09/29/2023. For more recent information or other questions, please contact us, FEP Medicare Prescription Drug Program Customer Care at 888-338-7737 (TTY users should call 711) 7 days per week, 24 hours per day, or visit fepblue.org/medicarerx.

What is the FEP Medicare Prescription Drug Program FEP Blue Focus Option Formulary?

A formulary is a list of covered drugs selected by FEP Medicare Prescription Drug Program FEP Blue Focus Option in consultation with a team of health care providers, which represents the prescription therapies believed to be a necessary part of a quality treatment program. FEP Medicare Prescription Drug Program FEP Blue Focus Option will generally cover the drugs listed in our formulary as long as the drug is medically necessary, the prescription is filled at a FEP Medicare Prescription Drug Program FEP Blue Focus Option network pharmacy, and other plan rules are followed. For more information on how to fill your prescriptions, please review your Evidence of Coverage.

Can the Formulary (drug list) change?

Most changes in drug coverage happen on January 1, but we may add or remove drugs on the Drug List during the year, move them to different cost-sharing tiers, or add new restrictions. We must follow the Medicare rules in making these changes.

Changes that can affect you this year: In the below cases, you will be affected by coverage changes during the year:

- **New generic drugs.** We may immediately remove a brand-name drug on our Drug List if we are replacing it with a new generic drug that will appear on the same or lower cost-sharing tier and with the same or fewer restrictions. Also, when adding the new generic drug, we may decide to keep the brand-name drug on our Drug List, but immediately move it to a different

cost-sharing tier or add new restrictions. If you are currently taking that brand-name drug, we may not tell you in advance before we make that change, but we will later provide you with information about the specific change(s) we have made.

- If we make such a change, you or your prescriber can ask us to make an exception and continue to cover the brand-name drug for you. The notice we provide you will also include information on how to request an exception, and you can find information in the section below titled “How do I request an exception to the FEP Medicare Prescription Drug Program FEP Blue Focus Option’s Formulary?”
- **Drugs removed from the market.** If the Food and Drug Administration deems a drug on our formulary to be unsafe or the drug’s manufacturer removes the drug from the market, we will immediately remove the drug from our formulary and provide notice to members who take the drug.
- **Other changes.** We may make other changes that affect members currently taking a drug. We may add a generic drug that is not new to the market to replace a brand-name drug currently on the formulary, or add new restrictions to the brand-name drug or move it to a different cost-sharing tier or both. Or we may make changes based on new clinical guidelines. If we remove drugs from our formulary, add prior authorization, quantity limits and/or step therapy restrictions on a drug, or move a drug to a higher cost-sharing tier, we must notify affected members of the change at least 30 days before the change becomes effective, or at the time the member requests a refill of the drug, at which time the member will receive a 30 day supply of the drug.
 - If we make these other changes, you or your prescriber can ask us to make an exception and continue to cover the brand-name drug for you. The notice we provide you will also include information on how to request an exception, and you can also find information in the section below entitled “How do I request an exception to the FEP Medicare Prescription Drug Program FEP Blue Focus Option Formulary?”

Changes that will not affect you if you are currently taking the drug. Generally, if you are taking a drug on our 2024 formulary that was covered at the beginning of the year, we will not discontinue or reduce coverage of the drug during the 2024 coverage year except as described above. This means these drugs will remain available at the same cost-sharing and with no new restrictions for those members taking them for the remainder of the coverage year. You will not get direct notice this year about changes that do not affect you. However, on January 1 of the next year, such changes would affect you, and it is important to check the Drug List for the new benefit year for any changes to drugs.

The enclosed formulary is current as of 09/29/2023. To get updated information about the drugs covered by FEP Medicare Prescription Drug Program FEP Blue Focus Option please contact us. Our contact information appears on the front and back cover pages.

How do I use the Formulary?

There are two ways to find your drug within the formulary:

Medical Condition

The formulary begins on page 7. The drugs in this formulary are grouped into categories depending on the type of medical conditions that they are used to treat. For example, drugs used to treat a heart condition are listed under the category, Cardiovascular. If you know what your drug is used for, look for the category name in the list that begins on page 7. Then look under the category name for your drug.

Alphabetical Listing

If you are not sure what category to look under, you should look for your drug in the Index that begins on page 130. The Index provides an alphabetical list of all of the drugs included in this document. Both brand-name drugs and generic drugs are listed in the Index. Look in the Index and find your drug. Next to your drug, you will see the page number where you can find coverage information. Turn to the page listed in the Index and find the name of your drug in the first column of the list.

What are generic drugs?

FEP Medicare Prescription Drug Program FEP Blue Focus Option covers both brand-name drugs and generic drugs. A generic drug is approved by the FDA as having the same active ingredient as the brand-name drug. Generally, generic drugs cost less than brand-name drugs.

Are there any restrictions on my coverage?

Some covered drugs may have additional requirements or limits on coverage. These requirements and limits may include:

- **Prior Authorization:** FEP Medicare Prescription Drug Program FEP Blue Focus Option requires you or your physician to get prior authorization for certain drugs. This means that you will need to get approval from FEP Medicare Prescription Drug Program FEP Blue Focus Option before you fill your prescriptions. If you don't get approval, FEP Medicare Prescription Drug Program FEP Blue Focus Option may not cover the drug.
- **Quantity Limits:** For certain drugs, FEP Medicare Prescription Drug Program FEP Blue Focus Option limits the amount of the drug that FEP Medicare Prescription Drug Program FEP Blue Focus Option will cover. For example, FEP Medicare Prescription Drug Program FEP Blue Focus Option provides 30 tablets per prescription for atorvastatin 80 mg tablet. This may be in addition to a standard one-month or three-month supply.
- **Step Therapy:** In some cases, FEP Medicare Prescription Drug Program FEP Blue Focus Option requires you to first try certain drugs to treat your medical condition before we will cover another drug for that condition. For example, if Drug A and Drug B both treat your medical condition, FEP Medicare Prescription Drug Program FEP Blue Focus Option may not cover Drug B unless you try Drug A first. If Drug A does not work for you, FEP Medicare Prescription Drug Program FEP Blue Focus Option will then cover Drug B.

You can find out if your drug has any additional requirements or limits by looking in the formulary that begins on page 7. You can also get more information about the restrictions applied to specific covered drugs by visiting our website, fepblue.org/medicarerx, that explain our prior authorization and step

therapy restrictions. You may also ask us to send you a copy. Our contact information, along with the date we last updated the formulary, appears on the front and back cover pages.

You can ask FEP Medicare Prescription Drug Program FEP Blue Focus Option to make an exception to these restrictions or limits or for a list of other, similar drugs that may treat your health condition. See the section, “How do I request an exception to the FEP Medicare Prescription Drug Program FEP Blue Focus Option’s formulary?” on page 4 for information about how to request an exception.

What if my drug is not on the Formulary?

If your drug is not included in this formulary (list of covered drugs), you should first contact Customer Care and ask if your drug is covered. For more information, please contact us. Our contact information, along with the date we last updated the formulary, appears on the front and back cover pages.

If you learn that FEP Medicare Prescription Drug Program FEP Blue Focus Option does not cover your drug, you have two options:

- You can ask Customer Care for a list of similar drugs that are covered by FEP Medicare Prescription Drug Program FEP Blue Focus Option. When you receive the list, show it to your doctor and ask them to prescribe a similar drug that is covered by FEP Medicare Prescription Drug Program FEP Blue Focus Option.
- You can ask FEP Medicare Prescription Drug Program FEP Blue Focus Option to make an exception and cover your drug. See below for information about how to request an exception.

How do I request an exception to the FEP Medicare Prescription Drug Program FEP Blue Focus Option’s Formulary?

You can ask FEP Medicare Prescription Drug Program FEP Blue Focus Option to make an exception to our coverage rules. There are several types of exceptions that you can ask us to make.

- You can ask us to cover a drug even if it is not on our formulary. If approved, this drug will be covered at a pre-determined cost-sharing level, and you would not be able to ask us to provide the drug at a lower cost-sharing level.
- You can ask us to cover a formulary drug at a lower cost-sharing level. If approved, this would lower the amount you must pay for your drug.
- You can ask us to waive coverage restrictions or limits on your drug. For example, for certain drugs, FEP Medicare Prescription Drug Program FEP Blue Focus Option limits the amount of the drug that we will cover. If your drug has a quantity limit, you can ask us to waive the limit and cover a greater amount.

Generally, FEP Medicare Prescription Drug Program FEP Blue Focus Option will only approve your request for an exception if the alternative drugs included on the plan’s formulary, the lower cost-sharing drug or additional utilization restrictions would not be as effective in treating your condition and/or would cause you to have adverse medical effects.

You should contact us to ask us for an initial coverage decision for a formulary or utilization restriction exception. **When you request a formulary or utilization restriction exception you should submit a**

statement from your prescriber or physician supporting your request. Generally, we must make our decision within 72 hours of getting your prescriber’s supporting statement. You can request an expedited (fast) exception if you or your doctor believe that your health could be seriously harmed by waiting up to 72 hours for a decision. If your request to expedite is granted, we must give you a decision no later than 24 hours after we get a supporting statement from your doctor or other prescriber.

What do I do before I can talk to my doctor about changing my drugs or requesting an exception?

As a new or continuing member in our plan you may be taking drugs that are not on our formulary. Or, you may be taking a drug that is on our formulary but your ability to get it is limited. For example, you may need a prior authorization from us before you can fill your prescription. You should talk to your doctor to decide if you should switch to an appropriate drug that we cover or request a formulary exception so that we will cover the drug you take. While you talk to your doctor to determine the right course of action for you, we may cover your drug in certain cases during the first 90 days you are a member of our plan.

For each of your drugs that is not on our formulary or if your ability to get your drugs is limited, we will cover a temporary 30-day supply. If your prescription is written for fewer days, we’ll allow refills to provide up to a maximum 30-day supply of medication. After your first 30-day supply, we will not pay for these drugs, even if you have been a member of the plan less than 90 days.

If you are a resident of a long-term care facility and you need a drug that is not on our formulary or if your ability to get your drugs is limited, but you are past the first 90 days of membership in our plan, we will cover a 31-day emergency supply of that drug while you pursue a formulary exception.

Tier 1	Generic Drug
Tier 2	Preferred Brand Drug
Tier 3	Non-Preferred Drug
Tier 4	Specialty Tier

For more information

For more detailed information about your FEP Medicare Prescription Drug Program FEP Blue Focus Option prescription drug coverage, please review your Evidence of Coverage and other plan materials.

If you have questions about FEP Medicare Prescription Drug Program FEP Blue Focus Option, please contact us. Our contact information, along with the date we last updated the formulary, appears on the front and back cover pages.

If you have general questions about Medicare prescription drug coverage, please call Medicare at 1-800-MEDICARE (1-800-633-4227) 24 hours a day/7 days a week. TTY users should call 1-877-486-2048. Or, visit <http://www.medicare.gov>.

FEP Medicare Prescription Drug Program FEP Blue Focus Option Formulary

The first column of the chart lists the drug name. Brand-name drugs are capitalized (e.g., MITIGARE) and generic drugs are listed in lower-case italics (e.g., *allopurinol*).

The information in the Requirements/Limits column tells you if FEP Medicare Prescription Drug Program FEP Blue Focus Option has any special requirements for coverage of your drug.

You can find information on what the symbols and abbreviations on this table mean at the beginning of this table.

B/D	The drug listed can be covered by Medicare Part B or Medicare Part D. This is determined on case-by-case basis depending on what the drug is used for and how it is administered.
LA	Limited Access: a drug that may not be available at all pharmacies
PA	Prior Authorization (approval): you must have approval from the plan before you can get this drug
QL	Quantity Limit: there is a limit to how much of the medicine we will cover
ST	Step Therapy: you must try another drug before you can get this one
NM	Drugs that are not available at mail order

INTRODUCTION

FEP is pleased to provide the *2024 FEP MPDP Blue Focus Enhanced Drug Formulary* as a useful reference for drug product selection. The drugs on the *FEP MPDP Blue Focus Enhanced Drug Formulary* have been reviewed by the FEP Pharmacy and Medical Policy Committee and FEP physicians and pharmacists and found appropriate for preferred status.

All the information in the *FEP MPDP Blue Focus Enhanced Drug Formulary* is provided as a reference for drug therapy selection. Specific drug selection for an individual patient rests solely with the prescriber.

PREFACE

The formulary is organized by sections, which refer to either a drug class or disease state. Unless exceptions are noted, all dosage forms and strengths of the drug cited are included in the formulary.

FEP may impose restrictions or not reimburse for specific drug products or types of products. For example, certain drugs and supplies for hair removal and hair growth are excluded from the pharmacy benefit. In addition, over-the-counter (**OTC**) products, with the exception of diabetes monitoring products, are generally not included in the pharmacy benefit. Some OTC products are listed in the formulary for informational purposes only.

The formulary is separated by Tiers in the following manner:

TIER	DEFINITION
Tier 1	Generic Drug
Tier 2	Preferred Brand Drug
Tier 3	Non-Preferred Drug
Tier 4	Specialty Tier

All drugs that are preferred are noted in their respective tiers of the drug lists throughout this formulary. Drugs may be reviewed by the FEP Pharmacy and Medical Policy Committee and designated non-preferred. FEP may designate certain drugs as non-preferred, typically if the cost-effectiveness is less than other similar drugs.

PRIOR APPROVAL

Prior approval (**PA**) is required for certain drugs before FEP will cover them. The prescribing physician may request PA by calling toll-free 1-855-344-0930. The list of prior approval medications is subject to change. For a current list of medications that require prior approval please see our **Prior Approval** web page.

QUANTITY LIMITATIONS

Quantity limitations (**QL**) have been established for some of the medications covered by FEP. Requests for quantities greater than allowed can be submitted to the Prior Approval program by the prescribing physician by calling toll-free 1-855-344-0930.

PHARMACY AND MEDICAL POLICY COMMITTEE

The role of the FEP Pharmacy and Medical Policy Committee includes evaluating new medications and making recommendations for the designation of preferred or non-preferred status on the *FEP MPDP Blue Focus Enhanced Drug Formulary*. The FEP Pharmacy and Medical Policy Committee is made up of physicians and pharmacists who are not employees or agents of, nor have financial interest in FEP.

PRODUCT SELECTION CRITERIA

The FEP Pharmacy and Medical Policy Committee will consider U.S. Food and Drug Administration (FDA) approved drugs for preferred status designation. The evaluation includes a literature review; expert opinion may also be sought. Formal reviews are prepared that typically address the following information:

- Safety
- Efficacy
- Comparison studies
- Drug interactions
- Approved indications
- Formulation and administration
- Adverse effects
- Contraindications
- Pharmacokinetics
- Patient compliance considerations
- Medical outcome and pharmacoeconomic studies

When a new drug is considered for preferred status, an attempt will be made to examine the drug relative to similar drugs currently preferred. In addition, entire therapeutic classes are periodically reviewed. The class review process may result in a designation of non-preferred status to drug(s) in a particular therapeutic class, in an effort to continually promote the most clinically useful and cost-effective agents.

Drugs evaluated by the Pharmacy and Medical Policy Committee and not classified as preferred to receive a non-preferred designation in the *FEP MPDP Blue Focus Enhanced Drug Formulary*. This designation indicates the Pharmacy and Medical Policy Committee's belief that the drug offers no important clinical or cost advantage over comparable

preferred drugs, or that there is currently insufficient information to determine its appropriate clinical role, or that questions remain regarding safety and effectiveness. In an open formulary environment, non-preferred drugs are covered under FEP's pharmacy benefit. However, there may be additional costs incurred by the patient to receive a non-preferred medication. Physicians are encouraged to prescribe preferred drugs.

All the information in the *FEP MPDP Blue Focus Enhanced Drug Formulary* is provided as a reference for drug therapy selection. The final choice of a specific drug selection for an individual patient rests solely with the prescriber.

GENERIC SUBSTITUTION

One way to reduce out-of-pocket cost is by requesting a generic drug. Generic drugs are usually priced lower than their brand-name equivalents. Prescription generic drugs are:

- Approved by the FDA for safety and effectiveness and are manufactured under the same strict standards that apply to brand-name drugs.
- Tested in humans to assure the generic is absorbed into the bloodstream in a similar rate and to the same extent as the brand-name drug. Generics may be different from the brand in size, color, and inactive ingredients, but this does not alter their effectiveness or ability to be absorbed just like the brand-name drug.
- Manufactured in the same strength and dosage form as the brand-name drugs.

When a generic drug is substituted for a brand-name drug, you can expect the generic to produce the same clinical effect and safety profile as the brand-name drug.

EDITOR

Your comments and suggestions regarding this *FEP MPDP Blue Focus Enhanced Drug Formulary* are encouraged. Your input is vital to this formulary's continued success. All responses will be reviewed and considered. Please send your comments to:
