# **Niktimvo**

## **Description**

Niktimvo (axatilimab-csfr)

#### **Background**

Niktimvo (axatilimab-csfr) is a monoclonal antibody that binds to colony stimulating factor-1 receptors (CSF-1R) expressed on monocytes and macrophages. Blocking CSF-1R with Niktimvo reduces the levels of these circulating proinflammatory and profibrotic monocytes and monocyte-derived macrophages, as demonstrated by a reduction of nonclassical monocyte counts in nonclinical studies with Niktimvo and inhibits the activity of macrophages in tissues (1).

#### **Regulatory Status**

FDA-approved indication: Niktimvo is a colony stimulating factor-1 receptor (CSF-1R)-blocking antibody indicated for the treatment of chronic graft-versus-host disease (cGVHD) after failure of at least two prior lines of systemic therapy in adult and pediatric patients weighing at least 40 kg (1).

Niktimvo carries warnings for infusion-related reactions and embryo-fetal toxicity. Interrupt or slow the rate of infusion or permanently discontinue Niktimvo based on severity of reaction. Niktimvo may cause fetal harm when administered to a pregnant woman. Advise pregnant women of the potential risk to the fetus. Advise females of reproductive potential to use effective contraception during treatment with Niktimvo and for 30 days after the last dose (1).

The safety and effectiveness of Niktimvo in pediatric patients weighing less than 40 kg have not been established (1).

Section: Prescription Drugs Effective Date: July 1, 2025

## Related policies

## **Policy**

This policy statement applies to clinical review performed for pre-service (Prior Approval, Precertification, Advanced Benefit Determination, etc.) and/or post-service claims.

Niktimvo may be considered **medically necessary** if the conditions indicated below are met.

Niktimvo may be considered **investigational** for all other indications.

# **Prior-Approval Requirements**

#### **Diagnosis**

Patient must have the following:

- 1. Chronic graft-versus-host disease (cGVHD)
  - a. Patient has received at least two prior lines of systemic therapy

#### AND ALL of the following:

- a. Patient weight ≥ 40 kg
- Females of reproductive potential only: patient will be advised to use effective contraception during treatment with Niktimvo and for 30 days after the last dose

# Prior - Approval Renewal Requirements

## **Diagnosis**

Patient must have the following:

- 1. Chronic graft-versus-host disease (cGVHD)
  - a. NO disease progression or unacceptable toxicity

#### **AND ALL** of the following:

a. Patient weight ≥ 40 kg

Section: Prescription Drugs Effective Date: July 1, 2025

Subsection: Antineoplastic Agents Original Policy Date: September 6, 2024

Subject: Nektimvo Page: 3 of 4

 Females of reproductive potential only: patient will be advised to use effective contraception during treatment with Niktimvo and for 30 days after the last dose

# **Policy Guidelines**

### Pre - PA Allowance

None

## **Prior - Approval Limits**

**Quantity** 6 vials per 84 days

**Duration** 12 months

# Prior - Approval Renewal Limits

Same as above

## Rationale

#### Summary

Niktimvo (axatilimab-csfr) is a colony stimulating factor-1 receptor-blocking antibody indicated for the treatment of patients with chronic graft-versus-host disease who have received at least two prior lines of systemic treatment. Niktimvo carries warnings for infusion-related reactions and embryo-fetal toxicity. The safety and effectiveness of Niktimvo in pediatric patients weighing less than 40 kg have not been established (1).

Prior approval is required to ensure the safe, clinically appropriate, and cost-effective use of Niktimvo while maintaining optimal therapeutic outcomes.
