

# CONTROLLING HIGH BLOOD PRESSURE

We want to help our members focus on their health and take steps to manage serious conditions like high blood pressure.

[fepblue.org](http://fepblue.org)

## THE SILENT KILLER

**High blood pressure** (also known as **hypertension**) is a condition that occurs when the pressure in your arteries and blood vessels is too high.

High blood pressure is often called the “silent killer” because there are typically no warning signs or symptoms. The best way to know if you have high blood pressure is to visit your doctor and have your numbers checked on a regular basis.

**1 IN 3 AMERICAN ADULTS HAS HIGH BLOOD PRESSURE**  
**THAT'S ABOUT 70 MILLION PEOPLE**

### Your blood pressure reading is made up of two numbers:

The top number measures **systolic pressure**, the pressure when the heart beats while pumping blood. The bottom number measures **diastolic pressure**, the pressure when the heart is at rest between beats.

-  **Normal:** Less than 120 mmHg/less than 80 mmHg
-  **Elevated:** 120–129 mmHg/less than 80 mmHg
-  **Hypertension Stage One:** 130–139 mmHg/80–89 mmHg
-  **Hypertension Stage Two:** 140 mmHg/90 mmHg or higher

### Why your numbers matter

Having high blood pressure significantly increases your risk for serious health conditions, such as heart attack, stroke, heart failure and kidney disease. While some risk factors, including age and family history, cannot be controlled, there are things you can do to help.

## HEALTHY LIFESTYLE CHANGES CAN LOWER YOUR RISK FOR SERIOUS CONDITIONS

- Limit sodium intake
- Consider the DASH (Dietary Approach to Stop Hypertension) eating plan
- Maintain a healthy weight
- Increase your physical activity and exercise
- Quit smoking
- Limit your alcohol consumption

### HYPERTENSION MANAGEMENT PROGRAM

If you have high blood pressure, the Hypertension Management Program\* can help you monitor your blood pressure numbers at home.

#### Here's how:

- Complete the Blue Health Assessment (BHA)<sup>1</sup> and answer “yes” to the question, “Has your doctor ever diagnosed you with high blood pressure?” Get started with the BHA at [fepblue.org/bha](https://fepblue.org/bha).
- If you have a claim to support that you have high blood pressure, we'll send you a letter explaining your eligibility for this program.
- Have your provider fill out the provider information on the letter and return it to us.
- Receive your blood pressure monitor—you're eligible for a new one every two years.

#### Earn additional rewards\*

Taking the BHA and setting goals with the Online Health Coach can help you stay on track with keeping your blood pressure under control. Standard and Basic Option members can also earn up to **\$170** by completing eligible activities.

Having regular conversations with your primary care doctor is also important to your health. If you're an FEP Blue Focus member, you're eligible to earn an incentive once we receive a claim from your annual physical. Rewards include a four-month gym membership, meal kit delivery subscription and more.

Learn more at [fepblue.org/incentives](https://fepblue.org/incentives).

## KNOW YOUR NUMBERS

Talk to your healthcare provider about your blood pressure and start tracking your numbers to help lower your risk for serious health conditions.

**My current  
blood pressure:** \_\_\_\_\_

**My target  
blood pressure:** \_\_\_\_\_

\*You can earn incentive rewards if you are the contract holder or a covered spouse on your Plan.

<sup>1</sup>This step only applies to Standard and Basic Option members.
